

Preparation for Carpet Beetles

TERMITE + PEST CONTROL

A Full Service Pest Control Company

1. Make all carpeting accessible for treatment. Remove as many items off the floor as possible. Specially under furniture, quiet zones are where beetles lay their eggs.
2. Vacuum thoroughly prior to our arrival then daily for 7-10 days after application.
3. After application exit for 4hrs along w/pets.

Liquid application will be throughout all carpeted areas, baseboards, under furniture, closets etc.
