

Preparations for Flea Service

TERMITE + PEST CONTROL

A Full Service Pest Control Company

1. Vacuum* all carpeted areas of the home BEFORE the technician arrives. After treatment vacuum daily for 7-10 days. Immediately after vacuuming empty the vacuum cleaner bag outside. **60% of the problem will be vacuumed up.
2. If the closet floors are carpeted, clear things off the closet floors. Remove as many items off the floors throughout home as possible.
3. All beds should be stripped of linens. Wash and dry at high temperatures. Pet bedding should also be washed/dried at high temperatures.
4. All people and pets must exit the home for four hours after application. If you have a fish tank, cover it with a damp towel.
5. Pets must be flea dipped before returning home after a service.

**The above are the unusual instructions and are the usual problem areas for these types of pest. If you have an infestation in a unique area or some other problem exist, please make sure to let the pest control technician know when they arrive onsite so they may also treat those areas. If you have any questions regarding treatment, please give us a call. We will be happy to answer any questions.

PREPARATION IS VITAL TO THE SUCCESS OF THIS TREATMENT., WE STRESS THE IMPORTANCE OF PROPER PREPARATION.
